NOTE ON PATIENT CONFIDENTIALITY

By Federal law, without your authorization, your protected health information (including but not limited to the results of your Health Risk Assessment) may NOT be disclosed to third parties except for the purposes of treatment, payment or health care operations or for public health or the safety, and will NOT be disclosed to your employer.

The steps outlined below are intended to provide brief notes regarding Activate Clinic’s approach to protecting the privacy and security of individually identifiable health information.

Steps taken to ensure this outcome:

- The Clinic operates according to privacy and security processes mandated by state and federal law
- The Clinic uses an electronic medical record protected by both access and authentication controls consistent with the National Institute of Standards in Technology requirements. No one can access Protected Health Information without satisfying appropriate multifactor security protections and only Activate personnel have access to such controls
- Data does not reside on personal computers—only in the secure web server in a remote and protected location
- All computer maintenance, cleaning, etc., is managed by outside contractors not the Employer
- The Activate Clinic premises is protected by a special security system and only Activate staff members have access to the Clinic Premises after hours

Pursuant to the Health Insurance Portability and Accountability Act of 1996 ("HIPAA"), the Health Information Technology for Economic and Clinical Health (HITECH) Act and the regulations promulgated to implement them, the Activate Clinic has implemented a Notice of Privacy Practices, which describes Activate Clinic’s approach to the privacy and security of Protected Health Information.
